Köksbryggning

Mikael Zetterberg & Jakob Nielsen

175x240 , 144p

To brew really good beer at home in the kitchen is actually both easy and fun – even for those who do not have any previous experience.

Kitchen brewing is more similar to ordinary cooking than traditional home brewing, and most of the equipment required you probably already have at home in your kitchen. With a minimal amount of effort you can soon boast your own really good kitchen-brewed beer.

Learn how to brew small volumes of a range of different beer styles, from fruity IPA and lager with a grass aroma to a full-bodied porter and light lagers with a good hoppy flavour. Using the basic techniques in the book around 20 beer types are possible (and a bonus recipe of cider) and your own kitchen brewery will soon be in full swing.

Jakob Nielsen and Mikael Zetterberg who run *The little kitchen brewery* want to help people brew their own really tasty beer at home in the kitchen.

About the authors

Mikael Zetterberg and **Jakob Nielsen** founded *Det Lilla Köksbryggeriet* (The little kitchen brewery) with the ambition of making home brewing possible for everyone. Even for those who didn't know they wanted to brew beer. Today their beer brewing kit and recipes are sold in many countries and after years of experimenting with recipes and dialogue with home brewers they have gathered a great deal of knowledge on the brewing of beer.
